# RossArt exhibition & cultural space

Welcome to the Forest Metaphysics exhibition, which presents a variety of physical and mental aspects of the forest.

Forest is a physical space, an ecosystem. At the same time, forest can also be a reflection of human thoughts, aspirations and emotions. At times, we can get lost in our thoughts as in the forest, or meet people who are like a breath of fresh forest air to us. Metaphysically, forest is present in our lives regardless of our awareness of this fact. The aim of the exhibition is to try to understand how existence works through the representation of different mental and physical entities and by posing fundamental questions of being and reality.

We invite you to join our journey through the forest and discover new aspects of being.

# Artists
